PROFESSIONAL SUMMARY

I have been working with IT since 2014. I had my first step working with infrastructure, when I built up knowledge about Linux and network. Since 2018, I have been focusing my study and work on development handle with stack JavaScript, TypeScript, NodeJS and ReactJS
I am convinced I want to keep being a good professional, then I need to strengthen focus and willingness to learn more and more. Besides that, to keep myself humble and have in mind I will never know everything at all, but if I work hard and do my best, I can accomplish whatever I want.
